Introducing our new DA (**D-Advanced**) Bracket.

In response to some churches having problems with people pushing against their kneelers and brackets bending we have come up with a new alternative. The **D-Advanced** Bracket.

These have identical pivot measurements to our D brackets with the added strength of 2 screw holes at the top crown to help prevent the brackets from bending at the top.

Type "DA" Combination Brackets

(Measuring 4 1/4" from pin to pin)

(Sold in Pairs/1 Loose and 1 Solid pin bracket)

(Brackets can be sold individually for a 10% up charge)

1 Pr. DA /PAIR
